

Court Scheduling System

PART I. CONSENT FORM

You are invited to participate in a usability testing study for the Court Scheduling System, a prototype designed to improve the process of reserving courts for events, sports, and community activities. The purpose of this study is to evaluate the usability of the system, specifically how easy, efficient, and user-friendly it is for users when performing scheduling tasks. Your feedback will help identify areas for improvement and enhance the overall user experience. You are invited because you may represent a typical user of the system, such as a student, athlete, event organizer, barangay official, or community member.

Procedure

If you agree to participate in this study, you will be asked to use the Court Scheduling System prototype and perform basic scheduling tasks such as booking a court or checking availability. After completing the tasks, you will answer a System Usability Scale (SUS) questionnaire based on your experience.

Duration

The entire activity will take approximately 10–15 minutes to complete.

Voluntary Participation

Your participation in this study is completely voluntary. You may choose not to participate or withdraw at any time without any penalty.

Confidentiality Statement

All information collected will be treated with strict confidentiality. Your identity will not be disclosed, and all responses will be used solely for academic purposes.

Risks and Benefits

This study involves minimal risk, limited only to the time required to complete the activity. While there are no direct personal benefits, your feedback will help improve the system and contribute to a more efficient and user-friendly court scheduling process.

MICHAEL B. AMATA

Course Instructor, Computational Sciences Department

Consent Statement

I have read and understood the information above. I voluntarily agree to participate in this study.

Participant Information

Name: _____

Signature: _____

Date: _____

If you have any questions about this study, you may contact:

Group Leader: Pauline Joy R. Piloneo

Email (optional): piloneopaulinejoy6@gmail.com

PART II. DEMOGRAPHIC PROFILE

Age: _____

Gender: _____

Course/Program: _____

Year Level: _____

PART III. SYSTEM USABILITY SCALE (SUS)

The following questionnaire is designed to measure the usability of the prototype. Please indicate your level of agreement with each statement based on your experience.

Questions	Strongly Disagree 1	Disagree 2	Neutral 3	Agree 4	Strongly Agree 5
1. I think that I would like to use this system frequently.					
2. I found the system unnecessarily complex.					
3. I thought the system was easy to use.					
4. I think that I would need the support of a technical person to use this system.					
5. I found the various functions in this system were well integrated.					
6. I thought there was too much inconsistency in this system.					
7. I would imagine that most people would learn to use this system very quickly.					
8. I found the system very cumbersome to use.					
9. I felt very confident using the system.					
10. I needed to learn a lot of things before I could get going with this					

PART IV. OPEN-ENDED QUESTIONS

Please answer the following question:

1. What improvements or suggestions can you recommend to enhance the usability of the system?
2. What did you like most and least about your experience using the system?
